

WEST EcoSeal

Sealing Solutions For Removable Top Boxes

ecoSeal

Customisable Sticker Formation, Quantity,
And Sticker Location

Bidirectional Application

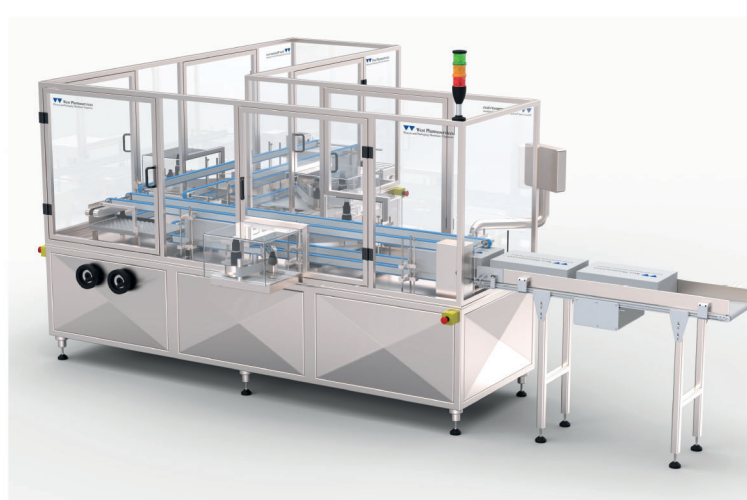

Controlled Reject Station

Vision Systems For Process Verification

The West EcoSeal is helping businesses strive for lower plastic usage, of up to a 98% reduction, by steering away from plastic-wrap sealing, and towards a cost-efficient solution for label sealing. The system continuously controls boxes through label application and vision inspection systems for process verification.

- Bespoke, UK manufactured design.
- Reliable labelling system.
- Boxes of any size within the workable dimensional range can be fed into the system using conveyors.
- Highly adjustable design resulting in minimal change parts and changeover times.
- Flexible infeed and outfeed options.
- System can be designed to work with any upstream and downstream equipment.
- A positive reject station ensures any faulty products are rejected before progressing through the packing process.

West EcoSeal
